General Imports of Cotton, Wool, and Manmade Fiber Manufactures

JULY 1985

Issued September 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Overview

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands, the U.S. Customs territory, which includes the 50 States, District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for the agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, include imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, between any of these outlying areas.

The U.S. import statistics also exclude American goods reentered to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs assessment purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a small carryover exists. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practical extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Abbreviation	Description
DOZ	Douzen
GR	Grain
LB	Pound
NO	Number
ST	Shipment
YR	Year

The country reported in the statistics is the country of origin as determined by the country where the merchandise was grown or manufactured, in instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

For more information, please contact the Chief, Foreign Trade Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20540. Telephone: 202/481-2500. For information on the availability of the U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country, Report FT 135, contact the Chief, Foreign Trade Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20540. Telephone: 202/481-2500.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

BUREAU OF THE CENSUS
LIBRARY

AUGUST 1985

Issued October 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Background

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands, and U.S. Customs territory, which includes the 50 States, District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, include imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low dutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of mail and household effects.

General imports, shown in this report, are a combination of imports for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus fully reflecting total arrivals of merchandise (except for transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone manifests, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs agreement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

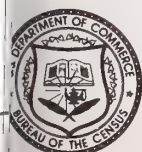

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a carryover exists. Carryover is caused principally by late transmittal of statistical documents to the Census Bureau. The Customs procedure which allows importers to file import documentation up to 10 workdays after the date of release of the merchandise may result in additional import carryover. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information, commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, information as to net quantity, value, commodity classification, and country of origin is verified by customs official entries filed for transactions valued over \$250 which are normally subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practical extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanatory Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

BUREAU OF THE CENSUS
LIBRARY

SEPTEMBER 1985

Issued November 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Average

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands, the U.S. Customs territory, which includes the 50 States, District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for file agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, include imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs apportionment purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a carryover exists. Carryover is caused principally by late transmittal of statistical documents to the Census Bureau. The Customs procedure which allows importers to file import documentation up to 10 workdays after the date of release of the merchandise may result in additional import carryover. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraiser purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

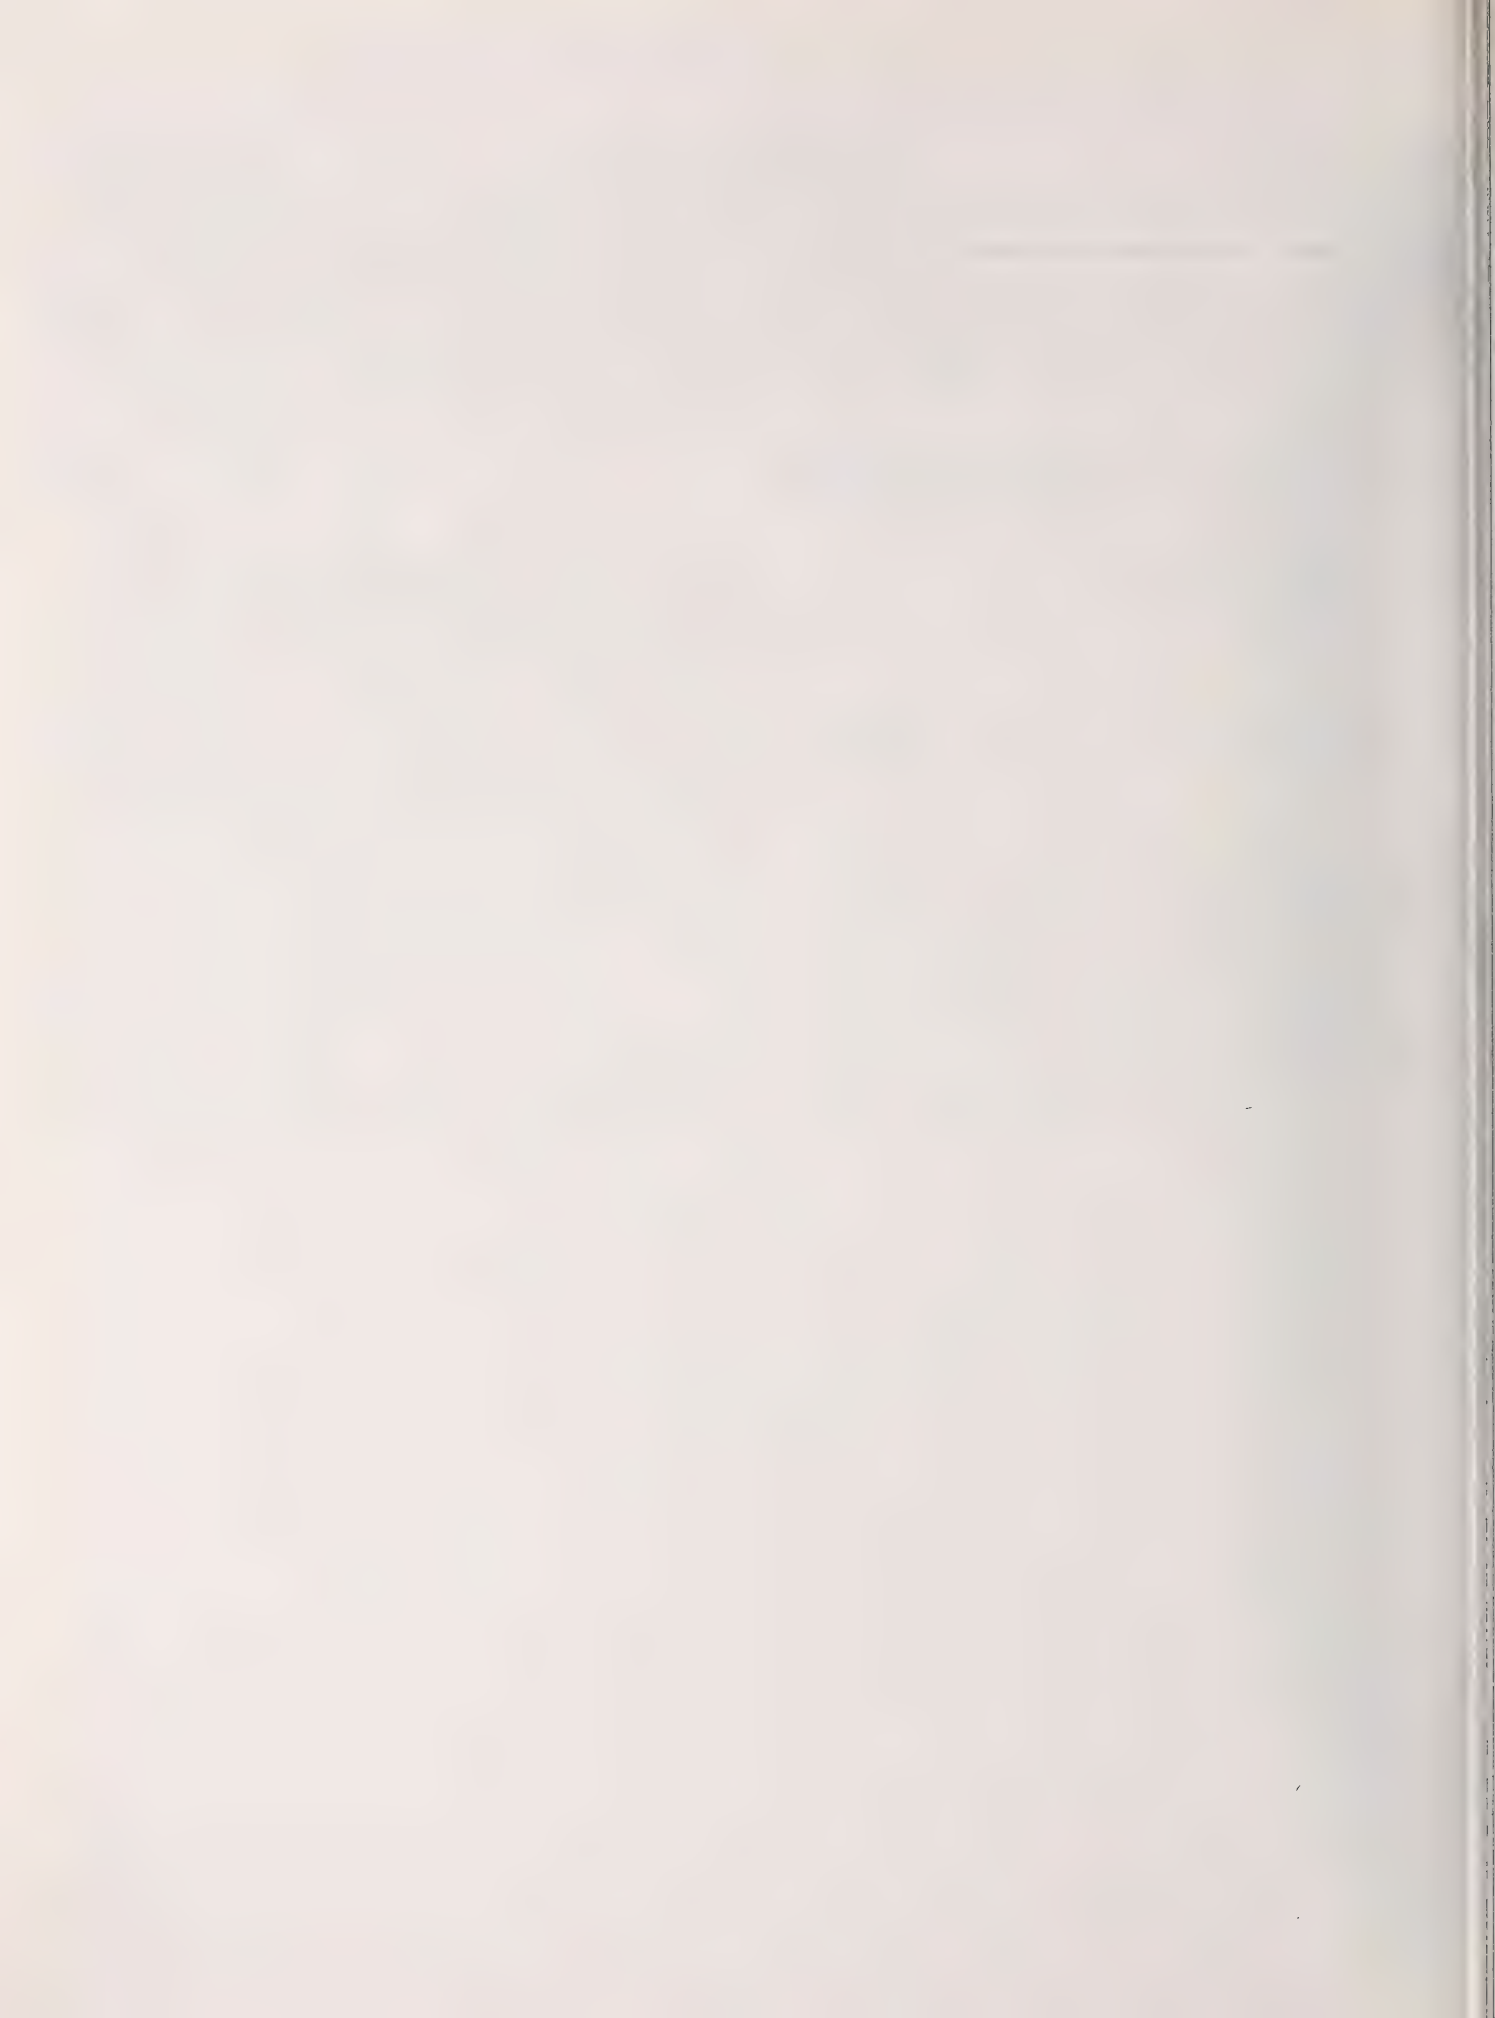

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

**Make your work or study easy
...fast...and accurate! Use the
"Guide to Foreign Trade Sta-
tistics: 1983"**

guide to foreign trade statistics: 1983

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1983.

COUNTY BUSINESS PATTERNS 1983

Now Available

Data on Employment, Payrolls & Establishments

County Business Patterns (CBP) presents annual data on employment, number of establishments, employment size of establishments, payrolls by two-, three-, and four-digit levels of the Standard Industrial Classification (SIC), for States and counties. This annual series includes a separate paperbound report for the United States, each State, the District of Columbia, and Puerto Rico.

Individual State reports present, for each county, number of establishments, employment, and payroll data by employment-size class to the four-digit SIC level. Also included, by major industry group, are data on the number of establishments, payroll, and number of employees, by employment-size class.

Summary includes data by major industry (four-digit SIC) level for the United States. For the United States, number of establishments, employment, and payroll data are also included by employment-size class

to the four-digit SIC level. Also included, by major industry group, are data on the number of establishments, employees, and payroll of administrative and auxiliary establishments.

CBP is a standard reference source of small-area data for business persons, market researchers, and industrial and civic planners.

CBP data are especially useful for:

- Analyzing market potentials
- Determining location and size of sales territories
- Establishing sales quotas and advertising budgets
- Locating production, marketing, and service facilities.

CBP data are shown in detail for the following broad industry categories:

- Agricultural services, forestry, and fisheries
- Mining
- Contract construction

- Manufacturing
- Transportation and other public utilities
- Wholesale trade
- Retail trade
- Finance, insurance, and real estate
- Services

Data in Other Formats

Published CBP data, by county and by industry, will be available at cost, on computer tapes. Inquiries should be addressed to Chief, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

The reports described in this announcement are also available on microfiche. For further information, contact: Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

For a descriptive order form listing all available titles and prices, fill in the request below, and mail to the address shown.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

OCTOBER 1985

Issued December 1985

T130-85-00

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands, the U.S. Customs territory, which includes the 50 States, District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for the agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, include imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs assessment purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the **44 agreement categories** of cotton textiles, the **25 categories** of wool textiles, and the **44 categories** of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a carryover exists. Carryover is caused principally by late transmittal of statistical documents to the Census Bureau. The Customs procedure which allows importers to file import documentation up to 10 workdays after the date of release of the merchandise may result in additional import carryover. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

NOVEMBER 1985

30-85-11

Issued January 1986

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Average

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands, the U.S. Customs territory, which includes the 50 States, District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for the agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, include imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods reentered to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone manifests, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs agreement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a carryover exists. Carryover is caused principally by late transmittal of statistical documents to the Census Bureau. The Customs procedure which allows importers to file import documentation up to 10 workdays after the date of release of the merchandise may result in additional import carryover. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

December 1985

Issued February 1986

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

average

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the **44 agreement categories** of cotton textiles, the **25 categories** of wool textiles, and the **44 categories** of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands, the U.S. Customs territory, which includes the 50 States, District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, include imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, between any of these outlying areas.

The U.S. import statistics also exclude American goods related to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low value nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of imports for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone manifests, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs agreement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a carryover exists. Carryover is caused principally by late transmittal of statistical documents to the Census Bureau. The Customs procedure which allows importers to file import documentation up to 10 workdays after the date of release of the merchandise may result in additional import carryover. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.
